Dear friends!

Bukovinian State Medical University which I have the honour to head is an innovative, forward-thinking University with high standards of teaching, research and support. For the years of its existence, the University staff has trained numerous medical and pharmaceutical specialists who now perform with dignity their honorable mission of preserving human health. Our study programmes equip students with knowledge and insights for professional lives within medicine, nursing and healthcare. Powerful educational, material and technical bases, scientific-pedagogical personnel, renovated content of training, the introduction of modern information technologies promote the effective mastering of the profession and moulding of the personality of a future medical specialist. Many laboratories with modern equipment are available in the preclinical departments and the clinics of Chernivtsi helping students to complete their formation and to conduct their researches. That is why Bukovinian State Medical University attracts thousands of students from all over the world who are willing to pursue medical career armed with a first-class qualification.

I would like to warmly welcome you to be a part of our University community. By choosing to study with us, you will give yourself a foundation that will set you apart for the rest of your life.

Welcome to Bukovinian State Medical University!

Taras Boychuk

Chancellor of Bukovinian State Medical University,
Doctor of Medical Sciences, Professor,
Academician of the Academy of Science of Higher School of Ukraine

www-bsmu.edu.ua
ABOUT UNIVERSITY

Bukovinian State Medical University is one of the largest higher educational establishments in Chernivtsi. It is fully government multistructural educational institution of the highest level of accreditation, which last year celebrated its 70th anniversary. Founded in 1944, Bukovinian State Medical University occupies a remarkable place among the leading medical educational institutions of Eastern Europe, combining tradition with dynamism and competence in research and education.

All activities of the University are approved by the Ministry of Public Health of Ukraine, to which it is subordinated. The University acts on the basis of its Statute, agreed by the Ministry of Education and Science of Ukraine and adopted by the Ministry of Public Health of Ukraine.

Bukovinian State Medical University is a member of the International Association of Universities (IAU), the World Health Organization (WHO), the Association of Carpathian Region Universities (ACRU), the Magna Charta Universitatum, and Bukovinian University Consortium.

University’s experience in the development of innovative technologies for medical education is acknowledged by a number of diplomas and gold medals, awarded at various international exhibitions, such as "Modern educational establishments" in the categories of "International cooperation in the field of education" (2013) and "Modern applications, innovative approaches and solutions for improving the quality of education" (2014).

University established several medical centers on the basis of its clinical departments: Regional center of minimally invasive surgery and gynecology, Regional center of endourology and lithotripsy, Training-medical dental center “University Hospital”, Center of neural-degenerative eye diseases, educational and practical centers of primary health care.
SPECIALITIES AVAILABLE AT BSMU

The University provides training on the following specialities:
- General Medicine
- Pediatrics
- Medical Psychology
- Dentistry
- Laboratory Diagnostics
- Nursing
- Clinical Pharmacy
- Pharmacy

The University provides continuity of higher medical education: Junior Specialist → Bachelor → Medical Specialist → Master → post graduate education. If you have already graduated from other medical university you can apply for Clinical Residency, PhD programs (27 specialities), Doctor of Medicine (6 specialties).

The University includes a medical lyceum, Chernivtsi, Vashkivtsi, Novoselytsia and Kovel Medical Colleges, four medical faculties, dentistry and pharmaceutical faculties, faculty of post-graduate studies and preparatory department for Ukrainian and foreign students.

Nowadays the University has 12 academic buildings, all the Clinical Departments are located in 27 medical and pharmaceutical institutions of Chernivtsi and are equipped with modern facilities. There are 17 computer labs used for teaching different subjects, practical classes and seminars, testing, studying e-learning textbooks, on-line display of surgeries, etc.

Since August 2014 one of the Emergency care hospitals of Chernivtsi was reorganized into the University Hospital, on the basis of which Regional center of endoscopic surgery was established. In the nearest future other centers will be organized, such as Center of purulent surgery and diabetic foot, Center of burns and dermatoplasty, Center of plastic and reconstructive surgery, Center of endoprosthesis replacement, Center of internal medicine and gastroenterology.

The University library is a coordinating network which consists of 5 lending libraries and 9 reading rooms with Wi-Fi access system. Today the library fund includes more than 400 thousand copies.
**MEDICAL FACULTY**

Nowadays the medical faculty is the most significant among other faculties of the University. More than 5000 students study there, including more than 1000 foreign students from over 40 countries of the world. The teaching process is ensured by almost 700 tutors – academicians, professors, assistant professors, senior teachers.

**LANGUAGES OF INSTRUCTION**

Teaching is provided in English and Ukrainian medium. Many of our tutors and lecturers worked at higher medical educational schools of foreign countries in Asia, Africa, South America. They have a good command of foreign languages and abundant experience of training foreign students.

**TUITION FEES**

Tuition fees are specified by the Ministry of Education and Science of Ukraine yearly and are permanent during the whole educational period. Tuition fees at BSMU are one of the most reasonable in Ukraine.

**TEACHING STAFF**

University possess a highly qualified teaching staff. Experienced professionals who have the exclusive pedagogical skills are employed in BSMU. Nowadays there are 85 Doctors of Sciences, 78 Professors, 282 Associate Professors, and 374 Candidates of Science. The majority of them are Members of the Academy of Pedagogical Sciences of Ukraine, Honoured Science and Education Workers, Full Members of New York Academy of Medical Sciences, and Honoured Physicians of Ukraine. The researchers of the University have attained considerable achievements in the fields of cardiology, traumatology and orthopedics, gastroenterology, pediatrics, kidney physiology and pathology.

*Chancellor Taras Boychuk meeting with parents of BSMU students and future applicants during his trip to India, 2015*

*Professor of BSMU Georgiy Khodorovskyi, former Ambassador of Ukraine to India, presents credentials to the 9th President of India Shankar Dayal Sharma, 1993*
Before enrolling in Bukovinian State Medical University foreign students has a possibility to get training at the preparatory department with a specialization in public health, biology, physical education, agricultural sciences.

Today the Preparatory Department for foreign citizens is headed by Sorokhan Vasyl Denysovych, who is also associate professor at the Department of Infectious Diseases and Epidemiology.

Studying at the preparatory department lasts for one year and includes mastering natural sciences. The curriculum includes studying the Ukrainian language, Biology, Physics, Chemistry, Mathematics, Fundamentals of Computer Science and Technology, Local History, Geography and Culture.

Students who intend to study in English learn main curriculum subjects (Biology, Physics, Chemistry, Mathematics, Fundamentals of Computer Science and Technology) also in English.

After completing the preparatory course and successful passing the exams students are given a certificate with a recommendation for enrollment in higher educational establishments for appropriate specialities.
DENTISTRY FACULTY

The decree granted by State Accreditation Commission in 2006 gave Bukovinian State Medical University the right to train 100 students of educational and qualification level of "Specialist" with a specialization in "Dentistry". Therefore in 2008 the Dentistry Faculty was established in the University. Professor Bilookyi Viacheslav Vasylovych was appointed for the position of the Dean of the Faculty. Training of students with a specialization in "Dentistry" is provided by 24 university departments, which are located in 7 buildings and 4 clinical centers of the University.

At the moment 486 dental students are enrolled in the University. Moreover, 198 residents are currently trained at three departments of Dentistry Faculty: Surgical and pediatric dentistry department, Therapeutic dentistry department, and Prosthetic dentistry department.

In 2011 a new dental center was created as one of the divisions of the University clinic, where highly qualified teachers, interns and students can counsel and treat patients.

Dental students of Bukovinian State Medical University take active part in the development of the Dentistry Faculty as well as in the scientific and cultural life of the University. They participate in Ukrainian and International dental congresses, forums, and contests. In November 2013 a group of teachers and students of BSMU participated in the Annual Dental Meeting of the Association of French Dentists that took place in Paris and was aimed at finding innovative practical approach to solving problems of modern dentistry.
Taking into account the importance of improving the conditions of studying at the University for foreign students, on September 01, 2011, Medical Faculty № 3 was opened. Now foreign students specializing in “General Medicine” and “Pediatrics” are trained at this Faculty.

Representatives of many countries study at the Faculty. By the date of February 01, 2015, 1012 foreign students were enrolled at the Faculty. Their geographical representation is diverse: Europe, North America, Asia, and Africa. The citizens from India constitute the biggest community (about 65%).

The whole staff of the Medical Faculty № 3 together with other Departments of the University are constantly working on the improvement of educational process and training specialists according to the requirements of the current legislation of Ukraine considering the peculiarities of future doctors in their own countries.

The Faculty Scientific Council including representatives of five University Departments with the Dean at the head is envisaged to solve the main questions in the work of the Faculty. According to the University Regulations teachers and tutors constitute about 75% of the Faculty Scientific Council, and no less than 10% – students of the Faculty.

The staff of the Faculty encourages students to take an active part in social and cultural life of the University. Their national holidays, traditions and cultural festivals make the cultural life of Bukovyna brighter and richer.
MEDICAL PRACTICE

The fourth–sixth years in medical University include detailed studying of clinical subjects – Patients’ Care, Internal Medicine, general and specialized Surgery, Neurology and Psychiatries, Obstetrics and Gynecology, Pediatrics, and a lot of other specific subjects (for detailed information see annual curriculum). You will deal with causes of diseases, their signs and symptoms, classic and modern principles of laboratory and instrumental diagnostics, medical and procedural ways of treatment. You will have a unique possibility to communicate with patients and use the acquired knowledge and skills in practice. All the tutors in practical disciplines are highly qualified practicing physicians, who are always ready to share their wide experience with you.

Internal medicine includes basic knowledge of Cardiology (heart diseases), Pulmonology (pathology of the lungs and bronchi), Gastroenterology (digestive system disorders), Hematology (blood diseases), Nephrology (disorders of the kidneys), Endocrinology (hormones disturbances), Rheumatology (musculoskeletal pathology). Surgical specialities, which you will be dealing with, will give you knowledge and experience, a possibility to observe surgical interventions in General Surgery, Abdominal Surgery, Urology, Traumatology and Orthopedics, Oncology, Ophthalmology, Otolaryngology, Obstetrics and Gynecology and a lot of minor courses.

Moreover, foreign students have a possibility to complete an internship in University clinics of European countries or at their home country.

To be more precise, up to the end of your studies you will learn all the master’s secrets of intensive care.
POSSIBILITIES FOR STUDENT’S RESEARCH

The Scientific Students’ Society works progressively at Bukovinian State Medical University. The 1st year students can join the Scientific Students’ Society according to their interests where they will gain practical and theoretical skills of working with scientific literature. Starting from the 2nd and 3rd years of study, students can participate in practical researches or master the major principles of performing experiments at the departments of basic medical disciplines. Nowadays 109 foreign students are participants of Students’ Scientific Circle. As a result of students’ fruitful research work, up to 100 scientific papers are published in medical periodicals annually.

SCIENTIFIC EVENTS AT BSMU

A good tradition of Scientific Students’ Society is organization of the Bukovinian International Medical Conference for students and young scientists (BIMCO), where they can present their work and research results. English is one of the conference languages, and students and young scientists from all over the world are welcome to participate in this important event.

Moreover, University regularly organizes on-line lectures in English language, which are given by professors and practitioners from Spain, Germany, Poland, USA and Switzerland.

University cares about the future of its graduates. That is why it invites educators from India to coach students so that they could successfully pass Medical Council of India Screening Test, also known as Foreign Medical Graduates Examination (FMGE).
After receiving Diploma foreign citizens can continue education by two different ways:

1. Primary specialization of the graduates of High Medical (Pharmaceutical) Educational Establishments of III–IV accreditation levels in clinical residency.

Clinical residency is a 2-4 year training programme in a chosen speciality when a resident works at a hospital. Residents participate in all activities of the hospital – attend patients, intra–clinic conferences and disputes, they have access to medical documents, follow professors and other skilled specialists during their rounds and participate in clinical manipulations. At the same time, there are advanced lectures and meetings for residents conducted by chiefs of the departments with explanations of the most complicated cases, key aspects of diagnostics and the latest international treatment guidelines.

PhD thesis preparation is an advanced way of post–diploma training that includes all the activities of clinical residency combined with the development of own research project and preparation of a thesis under the supervision of the best professors of the University. After that the thesis are presented and defended in front of the Scientific Council of the University and then – in front of the specialized Council. That will give the owner not only practical experience but scientific PhD degree with possibility for international verification as well.
POSTGRADUATE STUDIES

The main tasks of the faculty of postgraduate studies are:

• primary specialization of the graduates of High Medical (Pharmaceutical) Educational Establishments of III–IV accreditation levels in clinical residency;

• obtaining of the educational qualification degree of Master of Medicine (Pharmacy) in certain speciality by physicians and pharmacists;

• physicians retraining with awarding the title of a doctor (pharmacist) for acquiring a new, second medical (pharmaceutical) speciality;

• professional development and organization of passing of pre–attestation courses, cycles as well as thematic training for/by physicians;

• probation of physicians who had a break in their practical activities or didn’t take the attestation or exams in time.

The department cooperates with foreign partners in the field of introduction of new scientific–substantiated standards for the postgraduate specialization. See below the full list of specializations that a graduate can acquire while studying at the University.

LIST OF SPECIALIZATIONS FOR POSTGRADUATES

• Internal medicine (Cardiology, Gastroenterology, Endocrinology)
  • Surgery
  • Anaesthesiology
  • Obstetrics and Gynecology
  • Ophthalmology
  • Pediatrics
  • Traumatology and Orthopaedics
  • Infectious Diseases
  • Pulmonology
  • Phthisiology
  • Neurology
  • Dermatoveneorology
  • Otolaryngology
  • Urology
  • Oncology
  • General Practice - Family Medicine
  • Allergology

• General Hygiene
  • Neonatology
  • Children’s Gynecology
  • Children’s Surgery
  • Microbiology and Virology
  • Neurosurgery
  • Nephrology
  • Oncological Gynecology
  • Organization and Economics of Public Health Service
  • Pathological Anatomy
  • Radiology
  • Forensic Medicine
  • Therapy
  • Psychiatry
  • Physiotherapy
  • Functional Diagnostics

www.bsmu.edu.ua
Dear applicants!

It is not an easy task to choose an appropriate University to study medicine. But if you want to become a highly-qualified specialist, you should come to Bukovinian State Medical University. BSMU provides lots of opportunities for students and gives access to a huge range of extracurricular activities.

Our primary purpose is to help students to achieve the highest academic standards. The medical programme will equip you with the clinical, communication and leadership skills for your future career as a medical practitioner. In addition to the outstanding facilities and excellent training that are available to all our students, we offer special support for international students through our tutors. This support includes dedicated student advisers who are available to help you enroll and settle in to your new study life.

BSMU is a leader in preparing students to become highly competent and confident doctors. We are proud of our reputation as one of the best higher medical establishment in the country. We want our students to be the best too – by learning and developing first class clinical skills and nurturing excellence in scientific understanding. Take into consideration that studying at the university should be done with professionalism and seriousness. We expect from our students full commitment, tenacity and diligence, the everyday acquisition of knowledge.

I am sure your stay here will be a memorable and valuable step in your medical career development.

Prof. Oleksandr Ivashchuk

Vice-Chancellor on Science and International Relations, Head of Oncology and Radiology Department
International cooperation is an integral part of Bukovinian State Medical University activities as well as an important tool in ensuring high quality of education and its compliance with international standards. That’s why all the efforts of the Department of International Relations are aimed at the development, expansion and consolidation of international contacts in the world community and integration of the University into the international academic society.

International activities of the University are expanding and improving from year to year. Nowadays BSMU maintains friendly relations with 36 foreign universities and research institutes of Germany, Poland, France, Switzerland, India, Romania, the Republic of Moldova, etc. Moreover, thanks to the establishment of international cooperation and signing of bilateral cooperation agreements BSMU is now conducting 10 joint researches. Since 2014 University participates in the “Erasmus Mundus” action 2 project, providing prominent students a possibility to get involved into academic mobility.

High academic university standards, daily improvement of conditions for living and recreation, the city infrastructure are those factors that contribute to the increase in student community. Each year international department organizes promotional campaigns in the Republic of India, the Hashemite Kingdom of Jordan, Republic of Ghana and other countries, that are aimed at meeting with prospective students and their parents and give information about studying at BSMU and system of higher education in Ukraine in the whole. At present more than 1000 foreign students from 40 countries are getting higher education at the University.

Such growth is the sign of the University stability and high opinion of foreign colleagues concerning the acquisition of knowledge and skills here. The majority of our graduates have confirmed their knowledge and high qualification level abroad and currently work in the medical sphere worldwide.

STUDENTS’ LIFE

Bukovinian State Medical University can provide accommodation for students (annual accommodation fee is 30–50 USD per month depending on chosen comfort conditions). Students’ hostels are located closely to principal buildings and clinics of the university – 10–15 min walking distance. Hostels contain everything required for studies, everyday life and recreation: an Internet-club, a library, a canteen with cuisines of different countries, cafes, the laundry, the billiard, gym, satellite TV with access to Indian channels. Students’ relatives can visit them and stay in special rooms for guests, settled in the University.

After admission to the University all students are divided into academic groups. For the first three years of education each group is led by a certain tutor – an experienced staff representative with a good command of the English language who helps to adapt to a new country and new conditions, solve problems related to communication and academic difficulties. Our students never have the feeling of being abandoned.
Studying at Bukovinian State Medical University is something more than being among historical buildings, meeting prominent lecturers and attending well-organized tutorials. It also means a unique experience of living in a beautiful university city, the possibility of being a part of lovely institution’s traditions, meeting a lot of interesting people and making new friends. The University does its best for students to feel at home, be part of a large family, meet together for celebration of holidays and notable dates. There is a recreation camp near the Dniester River, which belongs to the University, so students have the possibility to spend their leisure time there, filling it with sports and games or just relaxing in nature’s lap. The University possesses also the Palace “Akademichnyi”, where important celebrations are held.

*We invite you to complete your medical education at Bukovinian State Medical University. We would be happy to have you with us!*
Due to its geographical location and natural resources, the city was a constant attraction for foreigners – Tatars, Poles, Austrians, Hungarians, Russians, Jews, Germans etc. Today population includes Ukrainians, Russians, Romanians, Moldavians, Jews, and Poles. A lot of students, who study at BSMU, represent different parts of the world and contribute to the cultural and everyday life of the city.

Our University has always been distinguished by tolerant attitude towards different religions. To meet the religious needs of students a Mosque was organized in the hostel. At the days of the most important holidays of Christianity, Islam, Hindu students of these religions are excused from classes to be able to administer the divine service both in the University and outside.
USEFUL INFORMATION

**Accommodation**
Cost of living in Chernivtsi is approximately the following:
• room in a hotel – 15–50 USD per night;
• living in the hostel – 30–50 USD per month (depending on conditions);
• rent of the apartment – 60–300 USD per month.

**Meals**
Average cost of one meal depends on the place where you choose to eat:
• canteen – 3 USD;
• cafe – 5 USD;
• disco bar – 20 USD;
• restaurant – 30 USD.

**Phones**
For performing an international call you have first to dial 0, after second tone of connection – proceed with 0, then code of the country, region and telephone number. To call to Ukraine from abroad using mobile phone, you need to dial the code of Ukraine +38, the local code of Chernivtsi 0372 and telephone number.

For calls within Ukraine dial 0, then after second tone – just dial the code of the region and the telephone number you need. Mobile communication network is highly developed in Ukraine, giving you the possibility to choose the mobile operator.

**Post Offices**
There are enough Post Offices in Chernivtsi. Express mail delivery services are available as well.

**Public transport**
You may choose among several means of public transport: trolleybus, bus, or taxi. The tickets are bought in transport directly. The cost of a ticket for trolleybus is 0,06 USD, for bus – 0,12 USD for one ride (depending on the route). The cost of ride by taxi starts from 1,2 USD and depends on time and travel distance.
UKRAINE

Ukraine is the second largest country in Europe with 42 million people. The population density is more or less equal all over the country.

A good way of getting to know Ukrainian people is to join Ukrainian associations, clubs and non-profit groups. If you have a favourite activity or a hobby, there is sure to be a suitable society or club for you.

Love of nature is Ukrainian national characteristic. There are a lot of lakes, rivers, forests, mountains in the country. A lot of people in Ukraine have their own cottages in the suburbs of big cities, and prefer spending their holidays and vacations close to nature. Summer offers you vacations at the Black Sea or in the Carpathian mountains. Winter presents you an opportunity to skate and ski, or just to relax observing the magic of frost and snow.

Ukraine is a democratic country. It is a republic under a mixed semi–parliamentary semi–presidential system with separate legislative, executive, and judicial branches. The Ukrainians have developed a form of society that maintains equality, cooperation and democracy in every aspect of life. Equal rights are guaranteed by the laws of Ukraine. All forms of discrimination due to ethnic background, skin colour, religious beliefs or sexual inclinations are forbidden by the law.
The climate of Ukraine is moderate continental. Average temperature is –4°C in January and +22°C in June.

Today special attention in Ukraine is paid to the development of infrastructure: modernizing highways, railways and airports and the construction of hotels. This will allow the country to realize its transit potential, because its position between Europe and Asia gives Ukraine a unique opportunity to provide capacity for international passenger and freight traffic.

Ukraine’s national currency is Hryvnia (UAH). You can exchange foreign currency into Hryvnia in numerous exchange offices. The value of UAH may fluctuate and for spring 2015 was the following:

1 USD = 25 UAH App.
1 EURO = 27 UAH App.

Credit cards are widely used in Ukraine. Major local hotels and restaurants accept them. Wide network of cash dispensers (ATM) is developed in Ukraine.

Ukraine is located in one time zone, two hours later Greenwich Mean Time. The country observes daylight saving time from the first Sunday in April to the last Sunday in October by advancing the clocks one hour.
WELCOME TO CHERNIVTSI

Chernivtsi is an outstanding city of Western Ukraine, political and economical centre of Northern Bukovyna. The city is also considered one of the greatest cultural and educational centres of Ukraine. Chernivtsi region borders on Ivano–Frankivsk, Ternopil, Khmelnytsky and Vinnytsa regions of Ukraine, Romania and the Republic of Moldova.

As a rule, foreign citizens arrive to the international airport Boryspil (Kyiv), which has connections with the majority of countries worldwide. Transfer from Boryspil airport to Chernivtsi is provided by trains and buses.

CHERNIVTSI – THE CITY OF OLD TRADITIONS COMBINED WITH INNOVATIONS

More than 600 years of history have created a dynamic and business–like spirit which fills the city. Chernivtsi has unforgettable architecture, exquisite art, it combines the elements of the culture of various nationalities and is famous for the warm hospitality of its inhabitants. The magic power of history and rich cultural life attract many people to Chernivtsi. The city is like a legendary museum under the sky, which gives inspiration to everyone who visits it.

www.bsmu.edu.ua
Chernivtsi of today is a place where the past meets the future. The major part of the University lies in the heart of the city: everything here is close at hand. The city's old part is compact and charming. Visitors of the city stroll through beautiful parks, feel inspiring atmosphere and beauty of the former Bukovinian Archbishop's Residence, now – Yuriy Fedkovych Chernivtsi National University, relax in the hotels, visit the performances in the Drama Theatre, considered to be one of the most beautiful in Europe.

Student cafes, nightlife, a vibrant and intellectually stimulating atmosphere, rich culture and a big variety of leisure activities will make your staying here unforgettable. Chernivtsi is well known for its dynamic students’ life and traditional student societies organizing activities to any taste.

While living in Chernivtsi you will discover the spirit of ancient Bukovyna, legends of the Carpathian Mountains, that are hidden in every corner of its ancient buildings. You will feel this atmosphere in the eyes of local citizens, who are devoted fans of their beloved city – the best one in all the world.
DR. MAXWELL KAMEL
GHANA

"The importance of imagination, openness and flexibility of mind, integrity, initiative, respect for self and others are taught at BSMU from the very first day. I have achieved more than I ever thought possible. Gained knowledge and skills allowed me to get enrolled into clinical residency in the USA."

DR. JAVAL BHATT
